PROFESSIONAL SUMMARY

Aspiring Full Stack Developer and Data Analytics enthusiast with hands on experience in building responsive web applications, dashboards, and workflow oriented projects using modern frontend and backend technologies. Skilled in JavaScript, React.js, Node.js, Express.js, Python, SQL, REST APIs, and database management. Strong understanding of frontend development, backend integration, API handling, authentication systems, and responsive UI design. Passionate about solving real world problems through scalable applications, clean code practices, and data driven solutions. Fast learner with strong analytical thinking, debugging ability, and adaptability to new technologies.

TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS, Bootstrap, Responsive Web Design, Redux Basics
- **Backend:** Node.js, Express.js, REST APIs, Authentication and Authorization, JWT Basics, API Integration
- **Database:** MongoDB, MySQL, SQL Queries, Database Design Basics
- **Programming Languages:** JavaScript, Python, SQL
- **Tools and Platforms:** Git, GitHub, VS Code, Postman, Render, Vercel, Netlify, Firebase Basics
- **Data Analytics Skills:** Data Cleaning, Data Visualization, Dashboard Development, Excel, Power BI, Python Pandas, Reporting and Analytics

PROJECTS

3D Nike Shoe Website

- Technologies Used: React.js, Tailwind CSS, JavaScript
- Developed a responsive 3D Nike inspired ecommerce landing page with modern UI and interactive animations.
- Built reusable React components for product display and navigation.
- Improved user experience through responsive layouts and optimized frontend performance.
- Implemented clean component architecture and scalable folder structure.
- Added product sections for men and women with modern UI styling.

Expense Tracker Dashboard

- Technologies Used: React.js, Node.js, Express.js, MongoDB
- Built a full stack expense tracking application with authentication and dashboard features.
- Developed REST APIs for expense management and user operations.
- Implemented CRUD functionality for tracking income, expenses, and analytics.
- Designed responsive dashboard UI with charts and data visualization.
- Managed backend routing, API handling, and database integration.

Data Analytics Dashboard

- Technologies Used: Python, Power BI, Excel, SQL
- Cleaned and analyzed structured datasets to generate actionable business insights.
- Built interactive dashboards and reports for trend analysis and performance tracking.
- Worked with data preprocessing, visualization, and reporting workflows.
- Improved reporting accuracy through proper data validation and analysis.

INTERNSHIP EXPERIENCE

Flare Technologies

Present

Data and Technical Operations Intern

- Assisted in data handling, reporting, and workflow based operational tasks.
- Worked on technical troubleshooting, data organization, and process support activities.
- Contributed to automation oriented tasks and handled structured datasets.
- Collaborated on projects involving analytics, reporting, and operational workflows.
- Improved problem solving and debugging skills through real world technical tasks.

CERTIFICATIONS

- GenAI Powered Data Analytics Job Simulation by Tata
- Data Visualization Job Simulation by Tata
- Solution Architecture Job Simulation by AWS
- Technology Job Simulation by Deloitte
- TCS iON Career Edge Young Professional
- Cisco Cybersecurity Essentials

EDUCATION

Bachelor of Engineering, Electronics and Communication Engineering

2026

ACHIEVEMENTS

- Built multiple frontend and full stack development projects.
- Developed hands on experience in analytics, dashboards, APIs, and workflow automation.
- Contributed to GitHub and open source projects while improving collaboration, debugging, and version control practices.
- Regularly use Git and GitHub for repository management, project collaboration, and maintaining clean code workflows.
- Actively learning scalable backend systems and modern web technologies.
- Strong understanding of responsive web design and application workflows.
